Seeking Truth,  
Exposing Falsehood.

## Wisdom Is

Being able to manage the situations, relationships and challenges of life by applying the relevant dynamic principle(s) to the correct situation to the proper degree at the appropriate time. In large, modern, complex societies, wisdom is rare because of the many opposing subgroups; pervasive impersonal relations; excessive mobility; glaring inequality; emphasis on youth, celebrity, wealth, and the material; ecological abuse; and instability due to a hyper rate of change.
