

# Most Significant Discovery

2023

Thomas A. Burns PhD.

Klamath Falls, Oregon

In light of the extraordinary advances in knowledge and technology that have been made in the last couple of generations, what do I think is the most significant/outstanding/important discovery of my own lifetime of 82 years?

## My Major Contenders

### Micro Physics

- 1) The particle sub-components of the atom and nuclear energy,
- 2) Fission, fusion, nuclear weapons,  
We have developed enough capability to wipe out our planetary habitat and eliminate humans along with most other complex species.  
Or, we may have access to an unlimited energy source with water as the only byproduct [fusion].

### Macro Physics

- 1) The sub-components of the universe – the Milky Way Galaxy, galaxy clusters, filaments, billions of galaxies, trillions of solar systems, quadrillions of planets, millions of “habitable” planets able to support life as we know it – just in our galaxy,
- 2) The Big Bang origin proposition – with possible multiverses,
- 3) Energy as the primary form and basis for all matter in reality,
- 4) The 70+% of reality we do not even yet know how to conceptualize – dark matter and dark energy.

## My Winner

### Extraterrestrial Intelligent Life

- 1) The collective results of the focal 1947 Roswell UFO crash site incident and the vast evidence – in spite of the pervasive government cover ups and Sci-Fi extrapolations – for the existence of UAPs of alien origin [scientific conclusions rely on the quality as well as the quantity of the evidence],
- 2) We are not alone as an intelligent life form in the universe,
- 3) We are a species of lesser intelligence and capabilities among these species,
- 4) We have been visited on Earth for a long time by some of these superior humanoid species – most active since our nuclear arms development,
- 5) We are genetically related [DNA based] to some of these other intelligent humanoid species in an interplanetary network of intelligent life forms,
- 6) We may well be a source of genetic breeding material for these other species since we exist on a planet in a young solar system where other habitable planets in much older solar systems have been developing intelligent life for billions of years longer than in our case.

Want the Evidence for My Winner?

See my overview essay, “Is There Life Beyond Planet Earth?” together with the three accompanying documents that suggest the cumulative extent of the media and academic evidence produced especially over the last 70+ years.

“Selected UAP Extraterrestrial Resources,” 109 citations,

“Excerpt – Extraterrestrial Intelligence,” credentials and topics of 16 scientists worldwide addressing this topic in this edited academic volume, 2022,

“Reports of Efforts to Suppress the Extraterrestrial Basis for UAPs, 1947 – 2007.”

This essay and these three related documents are available on my website:

[www.dynamic-humanism.com](http://www.dynamic-humanism.com) . Use the topic button, select “Reality,” and scroll to the appropriate essay set.

In addition, I recommend the following four documentaries – in the very recent, highly active period of UFO/UAP disclosure since 2000:

**Out of the Blue: The Definitive Investigation On UFOs**, 2003, documentary, 1hr. 46 min., available free on Amazon Prime.

Examines the most well documented UFO cases worldwide together with commentary by various experts and the revelation at all points of systematic government cover ups. Discusses the 1997 full disclosure UFO report produced for the French government – and later obtained in full by the public – which examined the best UFO evidence worldwide by a selected group of military and scientific experts – concluding that a significant number of UFOs are real and of alien origin.

**UFO - Endgame to Disclosure**, 2023 1hr. 54 min. documentary featuring the head of the Disclosure Project, Steven Greer. The focus is on the realization of Eisenhower’s warning in 1960 of a take over of government by the military industrial complex in the name of national security. Greer indicates that this has occurred over the 70+ years since the 1947 Roswell UFO incident and the recovery of material and biological crash debris. Re-engineering has resulted in many technological advances most of which have been kept secret within off budget “black” projects contracted out to a cabal of macro economic global corporations who protect the energy based and distributed status quo, threaten whistle blowers and independent developers, and release only a part of what has been discovered and developed. Many UFOs are in fact man made, based on re-engineered extraterrestrial craft. Full disclosure and an open source approach to the discovered technology can both bring totally non-polluting zero point energy to humanity and end the unconstitutional, “deep state” threat.

**In Plain Sight: The Intelligence Community and UFOs**, 2023 documentary, 1hr, 21min. available free on Tubi.

This recent documentary includes revealing testimony – focused on the 1947 Roswell UFO crash site case – from Richard Doty, career counter intelligence officer in the US Air Force, and John Ramirez, career counter intelligence officer in the CIA. Includes information about one extraterrestrial humanoid “biological entity” who survived the Roswell crash and was kept in a secret facility where he underwent extensive investigation by many different scientific experts over the 5 year period that he lived. He is said to have been highly intelligent and the source of both very valuable information and genetic material that was later confirmed to be DNA based and related to humans on Earth. Ramirez also describes attending a one day CIA symposium for CIA intelligence officers involving a three part briefing with the following revealing titles: “UFO Studies Done by the CIA in the Past,” “The Evidence of Alien Hybrids and CIA Interest in Hybridization of the Human Genome,” and “Information Technology to be Disseminated Very Rapidly with Devices Not Yet Invented” [prior to cell phones]. Clearly, there can be no evidence of alien hybrids without extraterrestrial humanoid aliens; and there can be no interest in hybridization of the human genome without alien contact with humans! The topic of the second session alone confirms the reality of the basics claimed for extraterrestrial intelligent life phenomena.

**How Open Contact With *Aliens* Will Change The World**, Jim Garrison PhD, 2024, 1 hr., available free as an interview on YouTube at: [Reddit · r/UFObelievers](https://www.reddit.com/r/UFObelievers)

Garrison is the Director of the Washington, DC division of the New Paradigm Institute which supports full disclosure by all branches of the U.S government on the issue of Extraterrestrials. Garrison contends that there is evidence that Extraterrestrials have mastered alternative mental modes that allow them to bypass the restrictions of time, space and materiality. Garrison and Greer – together with their organizations – are the two major experts currently promoting Congressional pursuit of disclosure. They have been successful in supporting the resolution just passed on a bi-partisan basis in early 2024 that calls for comprehensive disclosure.

The following are the websites for the two most prominent organizations addressing the UFO/UAP – extraterrestrial intelligence issue: [www.cseti.org](http://www.cseti.org) [Center for the Study of Extraterrestrial Intelligence] and [www.mufon.com](http://www.mufon.com) [Mutual Unidentified Flying Object Network].

## Conclusion

The UFO/UAP phenomena and its extraterrestrial basis has a “difficult” history due to 1) the mix of legitimate investigations – both private and public, 2) systematic and comprehensive cover up and denial programs conducted for years by world governments – counter intelligence programs and officers, and 3) hyper exploitation of the subject by Sci-Fi and popular culture sources [especially film]. This mix successfully shoved the UFO/UAP topic into the background where it was bundled by most of us who are scientifically oriented as “unreliable, if not fanciful.” The last 20 years have seen a major change in this situation with the recovery of this topic as one legitimate to be seriously explored and investigated.

If you are not aware of this significant change in the view of the UFO/UAP phenomena and all the results that have derived from it, I suggest that you beware of automatically adopting the old negative view and attitude on this matter. Keep an open mind and be willing to probe. That is what I have done; I have not “Gone Bonkers.” It is only after a serious review of the modern, more exposed evidence that I have adopted the affirmative view that I have announced recently and declare here.

As humans in our everyday life, we naturally oscillate between minor and major scales of consideration, and if an issue is not pressing at any scale, it does not gain our attention for very long. The UFO/UAP extraterrestrial issue is just somewhat more pressing than our consideration of our life in the solar system, galaxy or universe. And yet we allow ourselves to be hugely interested and supportive in exploring that zone of expanding awareness – Hubble and Webb telescopes! UFO/UAP is not climate change, or the insanity of the Trump MAGA cult, or the Russian invasion of Ukraine, but we ignore its serious consideration when it comes to knowing who we are and how we may well be connected in the interplanetary framework. And the implications are enormous for how we continue to behave among ourselves as individuals and social groups – as compared to the advanced intelligent humanoid forms of what may well turn out to be our greater species genus. The time has come to stop ignoring the issue!

So,, my winner of the “Most Significant Discovery” of my lifetime goes to “Extraterrestrial Intelligent Life” because it totally changes all of our individual and societal worldviews. It does not just open up the vast micro and macro reaches of our reality. It situates us humans as biological and social animals in that vast reality, and it utterly exposes the fallacy of our central preeminence and of our anthropocentric perspective on life and reality.

After digesting this truly revolutionary change in our situation, the key question that emerges is: How do we appropriately, creatively, and responsibly adjust our view of ourselves and our reality to accommodate this new, greatly diminished importance of our existence?
