

Reality: An Infinitely Remote Target

2024

Thomas A. Burns PhD.

Klamath Falls, Oregon

The Situation

The More We Know

The More We Know What We Do Not Know.

The More We Know What We Do Not Know

The More Foolish Are All Our Claims of Certainty.

The More We Claim Religious or Scientific Certainty

The More We Impede Gaining Further Awareness.

The More We Impede Gaining Further Awareness

The More Dangerous Our Ignorance Becomes

To the Successful Future of Our Species.

The Challenge for Us Humans

Our Celebrated Achievements Not Withstanding,

At Our Best We Humans are Presently Infants

In Our Understanding of the Full Nature of Reality.

Reality Is One Vast, Totally Integrated Material and Energetic System.

This System of Reality as a Whole Is in a Perpetual State Of Change.

There Are No Real Constants for Our Theories to Rely Upon.

Informed Scientific Speculation and Evidence for Extraterrestrials Suggest

Our Current Theories Are Blind to Six or More Basic System Dimensions.

We Exist Within This Reality System.

We Can Never Achieve an Observer Position Outside This System.

So, We Can Never Construct a Complete Theory of Everything.

We Can

Gracefully Accept, Creatively Adjust, and Vigorously Persist

As We Make Our Way

Through the Vast Domain Of Our Ongoing Ignorance

Knowing There Is No Final Answer.

There Is Only Rigorously, Respectfully and Responsibly

Participating from Within the Always Evolving Adventure.
