

# Something About Nothing

2026

Thomas A. Burns PhD.

Klamath Falls, Oregon

“Nothing” Assumes The Absence  
Of Any Phenomena.

## The Material Perspective:

The Smallest Material Things Are Particles.  
Particles and Anti-Particles Are Forever and Everywhere  
Emerging and Disappearing,  
Even In a “Vacuum.”

Something Material Is Always Present.

So,  
From the Material Perspective  
There Is Never Nothing.

## The Immaterial Energy Perspective:

Energy Exists Everywhere All the Time.  
Energy Waves and Fields  
Are Infinitely Connected, Integrated and United.  
There Is No Separation.

Something Energetic Is Always Present.

So,  
From the Immaterial Energy Perspective  
There is Never Nothing.

## Conclusion:

Both Materially and Immaterially  
Nothing Does Not Exist.

There Is Always Something!

**THERE IS NO NOTHING!**
