## Evolution of Investigation and Revelation of the Extraterrestrial Matter

I have explored the UFO-UAP/Extraterrestrial phenomenon periodically since the later 1960s. Initially there were many isolated reports with mainly local observers and investigators. During this time, the government was especially fond of balloons as the explanation for UFOs, and the extraterrestrial theme got picked up and exploited by the entertainment and science fiction “industry.” The combination of fictional exploitation and systematic government dismissal and ridicule of UFO reported events instilled the view in the public that the extraterrestrial issue was a little more than a fantasy and not worthy of serious consideration. Still the reported UFO sightings and contact events persisted and investigative specialists emerged with more detailed accounts and suggestions of systematic government obfuscation. Slowly, local investigators coalesced into groups, and over time these groups grew in size to eventually become transnational organizations like MUFON [Mutual UFO Network]. Eventually, investigators began penetrating the intelligence agencies and getting some highly suggestive insider information on the participation of major corporations of the military industrial complex in analyzing UFO crash debris in behalf of reverse engineering the technology. All of this was intended to be kept tightly secret as orchestrated by MJ-12, the federal level secretive administrative organization with tight fingers in all of the government’s intelligence agencies and departments as well as the military industrial complex.

With the turn of the new millennium, a few intelligence insiders began to offer information on 1) the extent of the government’s black project commitment to the investigation of extraterrestrial matters, 2) the government’s vast intelligence commitment to secrecy, and 3) the existence of considerable research on extraterrestrial biologics, mainly from autopsies of crash site bodies. Finally in the modern era, and especially in the 2020s, intelligence officers who have spent careers investigating and administering within government UFO-UAP projects and programs began cautiously to speak out – ultimately revealing agreements having been reached between alien humanoids living on Earth and our government. These long-time, highly knowledgeable, insider whistleblowers provided information that was accompanied by much greater credibility. In this context, the need for disclosure received a huge boost, a disclosure movement arose with considerable public support, and eventually Congress committed to seriously investigating the alien issue. To date, Congress has only opened the door, and the secrecy forces within government remain in place with strong

influence including an ongoing disinformation campaign. We remain betwixt and between but with a much greater opportunity for full revelation.

Broadly speaking, this is the evolution of the treatment of the UFO-UAP/Extraterrestrial issue that I have observed over the years.

#### Recommendations for Sources of Additional Information

For the most comprehensive and detailed intelligence insider revelation package on the UAP/Extraterrestrial subject based on 30+ years of insider experience investigating UAP crash sites and interacting within the full range of government agencies and programs, I recommend:

Jefferson Souza, The Blue Planet Project Trilogy, 2013 – 2023 [edited by Gil Carlson], 250+ pages. [this document is loaded with explicit data, if a bit rough in statement and organizational quality]

For the best overall, current review of the information supporting full disclosure to the public of what the government knows and has investigated related to the extraterrestrial matter, I recommend:

Steven Greer, M.D., The Disclosure Project Briefing Document 2025, 325 pages [based on Greer's 30+ years of experience as the head of the Disclosure Project organization and an archive of thousands of pages of documents].

Also available from Greer is: "Disclosure With Dr. Steven Greer," 10 episodes of 30 minutes each available on the app GAIA [this series reviews the content of the 2025 Briefing Document].

#### Conclusion

If you have not digested at least the two documents above or the equivalent in the many other available information sources on the Extraterrestrial subject, you are likely to remain in the grip of the point of view defined by the still prevailing and comprehensive disinformation campaign of the government – "It's all just a fantasy." As extreme as it may seem, what I outline in my associated document, "Resolution of the Extraterrestrial Issue??," is no fantasy.
