

Disclosure: UFO/UAP, Ultra/Extra Terrestrials 2026

Thomas A. Burns PhD.

Klamath Falls, Oregon

For three years now we have been in a designated period of the U.S. government beginning to disclose what it knows about the UFO/UAP phenomenon and the closely associated matter of the existence of Ultra and Extra terrestrials. While progress has been slow in the release of previously classified documents from the many involved departments and agencies, several high level insiders and whistle blowers have come forward to reveal a lot of significant information. In what follows I describe the overall picture that has emerged. The many who have not followed this recent disclosure process may well be surprised by what has now been mostly confirmed to be the case.

1) UFOs are real and global in their presence on Earth, PERIOD! Moreover, the combined evidence suggests that in various iterations they have been present on Earth for a long time – perhaps thousands of years.

2) Justified by national security concerns, from the 1940s until the 2020s there has been a system-wide government secrecy and disinformation campaign – even at the global level – to keep information about extensive investigations of the combined UFO/Extraterrestrial phenomenon from both the public and the U.S. Congress.

3) Many defense and intelligence related corporations have participated in and benefited greatly from the CIA secretly authorized “black projects” dealing with the UFO – Aliens issue. Over time, these corporations together with the related government personnel – especially in intelligence branches – have become very powerful and relatively independent to the point of being able to largely manage themselves without external oversight. Indeed, it is asserted that a select group of high ranking individuals was created in the early 1950s known as MJ – 12, with its later versions continuing to oversee and direct these clandestine UFO related investigation and development activities to the present. Employing a strict “Need to Know” policy, even Presidents have been denied all but relatively superficial access to information about these programs.

4) UFO sightings have become considerably more common since the end of WWII with the development, testing, and initial use of atomic weapons. In this regard, the increased appearance of UFOs is most frequently associated with the location of global nuclear weapons facilities. On rare occasions, UFOs are reported by highly reliable sources to have totally, if temporarily, rendered inoperative both entire batteries of atomic weapons at these facilities together

with the allied facility communication operations. Such events seem to indicate a clear intent by some intelligent source to communicate a message of disapproval of these weapons along with the source's ability to deny their use!

5) The focus of the 80+ year government UFO secrecy program has been to hide a comprehensive UFO craft retrieval and reverse engineering effort. Relatively small UFOs do occasionally crash, and rapid retrieval and transport of the debris to secure sites sets the stage for this effort. Recent insider and whistleblower revelations indicate that this corporate led re-engineering effort has generated significant technological results including at least the initial mastery of anti-gravity propulsion and the development of prototype "flying saucers." It is estimated that many current UFO sightings, especially in areas proximal to military base test sites, are now actually our own craft.

6) WE ARE NOT ALONE!! UFO retrieval includes biologics, not just craft debris. Focal here are the bodies of dead craft occupants as well as the recovery and rehabilitation of a very few live survivors. The dead are reported to have been thoroughly studied for their physiologic and genetic characteristics, with the conclusion that they are definitely not our homo sapiens species. While most are hominoid in general character, they are very different from us, and among themselves they are significantly varied in terms of both species and technology.

7) Live UFO crash occupants are reported to have lived for as long as 5 years "in captivity" during which time they have been studied extensively revealing that as biological beings, they rely on both a very different source of energy and a largely telepathic system of communication. A select few of these survivors are reported to have provided valuable technological as well as origin information.

8) At least 57 different non-homo sapiens species have been identified in these UFO occupant retrieval and interaction programs. A few of these species have been resident on Earth for a long time – the Ultraterrestrials. Others visit Earth on different schedules – the Extraterrestrials.

9) Among the more resident humanoid species are: The Greys – tall and short, the Reptilians, and the Nordics. Each of the resident and non-resident species have their own interests, special characteristics, capabilities and orientations in relation to one another and to homo sapiens. Diversity in all respects is the norm. However, given the highly advanced capabilities of these species relative to us, it is very important to recognize that if virtually any of them wanted to eliminate us, they could now or could have done so far in the past. Given this long-term situation, we need to be extraordinarily careful about assuming that

any of these alternative hominoid species constitute a threat to us. In the larger hominoid context, it seems clear that we homo sapiens are the much less advanced residents “on the humanoid cosmic block;” so it follows that our emphasis should be on striving to become accepted as equals and not on being regarded as belligerent competitors.

10) Extremely concerning are the reports that our “covert” government has entered into independent agreements with some of these more resident Ultraterrestrials to trade advanced technological information for unimpeded access to designated resources and “territory” on Earth.

11) The location on Earth of Ultraterrestrials is a key to understanding our failure to discern them apart from their UFO “crafts.” The evidence suggests that Ultraterrestrials have established bases deep underground in what are relatively remote areas of Earth, under the oceans, and apparently under the ice of central Antarctica. Globally there may be thousands of these bases exhibiting facility development, energy utilization, and access technologies that greatly exceed our understanding. At the same time that there are these Earth bases, there is some evidence to suggest that some “terrestrials” may have city size “craft” facilities in space beyond Earth’s orbital environs from which they engage Earth with what are their smaller “saucer” drone crafts that we observe.

12) Utilization of what may be zero point energy sources, anti-gravity propulsion capabilities, access to interdimensional states of being with materialization-dematerialization options, and the ability to time travel seem to be common among many Ultra and Extra terrestrials. Credible reports of some of them having bases on the Moon and Mars together with the indications of crash survivors of “home” locations in other galaxies support the contention that these “terrestrials” may have an extensive presence at least at the solar and galactic scales. By contrast, we homo sapiens are making merely the initial moves to exceed Earth bound status without any of these capabilities.

Conclusion

The above description of Ultra and Extra Terrestrials, their UFO crafts, and their advanced capabilities represents what I understand to be the consensus picture among serious ufologists and credible, high ranking government insiders and whistle blowers. This is not science fiction! It is a picture that is slowly being disclosed at the government level, and in comparative terms it exposes us homo sapiens as childlike in our state of development. Accepting this diminished status in a larger humanoid context is challenging for us as a group because we are so strongly committed to the idea that we are so superior, not to mention our supposedly being the pinnacle creation of God in our religious postulations.

While disclosure has begun, it continues to suffer from substantial resistance by many in the powerful government and corporate black project elite. This elite controls huge, collective financial resources that have a significant impact on who our candidates for office are, who gets elected, and what government policies are proposed, confirmed, and implemented. The UFO-Ultra/Extra terrestrial matter is just one issue where we encounter this “cabal” and its substantial impact. Full disclosure on alien matters as well as on many critical social, economic and ecological issues requires exposing and eliminating this interior societal rot if we expect to stop our current democracy’s slide into autocracy.

Unfortunately, we modern homo sapiens are consumed by a focus on excessive competition among ourselves while we ignore our abuse of our supporting ecology to the point of putting our very survival as a species at risk. In this context, an argument can be made that we need the challenge of advanced humanoid aliens to curtail our arrogance and require us to get our act together in order to be “worthy” of a place in the larger “intelligent” life, cosmic framework.
